

H.F. HAND
CONSTRUCTORS

QUALITY POLICY

HF Hand utilise a Quality Management System to ensure the production and sustainability of first class work. The System consists of a Quality Plan coupled with project specific requirements, Australian Standards, Procedures, Specifications and Checksheets, all of which are integrated to achieve traceability of manufactured and constructed items.

The Company Targets the following objectives with respect to Quality Management

- Manage a Quality Control Program that meets the requirements of ISO 9001:2000
- Supply the most practical, economical and reliable product, consistent with customer contractual and quality assurance requirements.
- Foster pride in workmanship within the workforce through the pursuit of quality.

HF HAND CONSTRUCTORS Quality Assurance Program shall ensure that the contractual quality requirements are recognised and that uniform control of these requirements are adequately maintained.

Senior Management are final authorities and represent HF HAND CONSTRUCTORS on all quality matters relating to product, program as established by drawings, specifications and company quality control policies and procedures.

Geoff Spalding
DIRECTOR
